Summary of Record of Interview Requirements

Manual of Patent Examining Procedure (MPEP), Section 713.04, Substance of Interview Must be Made of Record

A complete written statement as to the substance of any face-to-face, video conference, or telephone interview with regard to an application must be made of record in the application whether or not an agreement with the examiner was reached at the interview.

Title 37 Code of Federal Regulations (CFR) § 1.133 Interviews

Paragraph (b)

In every instance where reconsideration is requested in view of an interview with an examiner, a complete written statement of the reasons presented at the interview as warranting favorable action must be filed by the applicant. An interview does not remove the necessity for reply to Office action as specified in §§ 1.111, 1.135. (35 U.S.C. 132)

37 CFR §1.2 Business to be transacted in writing.

All business with the Patent or Trademark Office should be transacted in writing. The personal attendance of applicants or their attorneys or agents at the Patent and Trademark Office is unnecessary. The action of the Patent and Trademark Office will be based exclusively on the written record in the Office. No attention will be paid to any alleged oral promise, stipulation, or understanding in relation to which there is disagreement or doubt.

The action of the Patent and Trademark Office cannot be based exclusively on the written record in the Office if that record is itself incomplete through the failure to record the substance of interviews.

It is the responsibility of the applicant or the attorney or agent to make the substance of an interview of record in the application file, unless the examiner indicates he or she will do so. It is the examiner's responsibility to see that such a record is made and to correct material inaccuracies which bear directly on the question of patentability.

Examiners must complete an Interview Summary Form for each interview held where a matter of substance has been discussed during the interview by checking the appropriate boxes and filling in the blanks. Discussions regarding only procedural matters, directed solely to restriction requirements for which interview recordation is otherwise provided for in Section 812.01 of the Manual of Patent Examining Procedure, or pointing out typographical errors or unreadable script in Office actions or the like, are excluded from the interview recordation procedures below. Where the substance of an interview is completely recorded in an Examiners Amendment, no separate Interview Summary Record is required.

The Interview Summary Form shall be given an appropriate Paper No., placed in the right hand portion of the file, and listed on the "Contents" section of the file wrapper. In a personal interview, a duplicate of the Form is given to the applicant (or attorney or agent) at the conclusion of the interview. In the case of a telephone or video-conference interview, the copy is mailed to the applicant's correspondence address either with or prior to the next official communication. If additional correspondence from the examiner is not likely before an allowance or if other circumstances dictate, the Form should be mailed promptly after the interview rather than with the next official communication.

The Form provides for recordation of the following information:

- Application Number (Series Code and Serial Number)
- Name of applicant
- Name of examiner
- Date of interview
- Type of interview (telephonic, video-conference, or personal)
- Name of participant(s) (applicant, attorney or agent, examiner, other PTO personnel, etc.)
- An indication whether or not an exhibit was shown or a demonstration conducted
- An identification of the specific prior art discussed
- An indication whether an agreement was reached and if so, a description of the general nature of the agreement (may be by attachment of a copy of amendments or claims agreed as being allowable). Note: Agreement as to allowability is tentative and does not restrict further action by the examiner to the contrary.
- The signature of the examiner who conducted the interview (if Form is not an attachment to a signed Office action)

It is desirable that the examiner orally remind the applicant of his or her obligation to record the substance of the interview of each case. It should be noted, however, that the Interview Summary Form will not normally be considered a complete and proper recordation of the interview unless it includes, or is supplemented by the applicant or the examiner to include, all of the applicable items required below concerning the substance of the interview.

A complete and proper recordation of the substance of any interview should include at least the following applicable items:

- 1) A brief description of the nature of any exhibit shown or any demonstration conducted,
- 2) an identification of the claims discussed,
- 3) an identification of the specific prior art discussed,
- 4) an identification of the principal proposed amendments of a substantive nature discussed, unless these are already described on the Interview Summary Form completed by the Examiner,
- 5) a brief identification of the general thrust of the principal arguments presented to the examiner,
(The identification of arguments need not be lengthy or elaborate. A verbatim or highly detailed description of the arguments is not required. The identification of the arguments is sufficient if the general nature or thrust of the principal arguments made to the examiner can be understood in the context of the application file. Of course, the applicant may desire to emphasize and fully describe those arguments which he or she feels were or might be persuasive to the examiner.)
- 6) a general indication of any other pertinent matters discussed, and
- 7) if appropriate, the general results or outcome of the interview unless already described in the Interview Summary Form completed by the examiner.

Examiners are expected to carefully review the applicant's record of the substance of an interview. If the record is not complete and accurate, the examiner will give the applicant an extendable one month time period to correct the record.

Examiner to Check for Accuracy

If the claims are allowable for other reasons of record, the examiner should send a letter setting forth the examiner's version of the statement attributed to him or her. If the record is complete and accurate, the examiner should place the indication, "Interview Record OK" on the paper recording the substance of the interview along with the date and the examiner's initials.

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Conlin on 2/3/05.

Discussed issues (2) to amend thru an examiner's amendment,

{A} Claim 3 being multi-dependent claim, wherein claim 5 was object-able for being multi-dependent on a previous multi-dependent, solution, change claim 3 to depend only from claim 1 and duplicate claim 3, to new claim 6, depending from claim 2, rectifies this issue.

{B} Abstract too long, maximum length 150 words, the examiner will rewrite, if not satisfied by applicant, the examiner will enter, a 312 amendment for the abstract, provided by applicant if applicant desires to do so.

The application has been amended as follows:

{A} Claim 3, line 2, remove, "or 2".

{B} Add new claim 6 (which is a duplicate of claim 3, which depends from claim 2), as recited below,

6. A recording and reproducing device as defined in claim 2, further comprising: an area selecting means for selecting one of areas stored in the recording/reproduction position storing means; and a reproduction instructing means for instructing the recording/reproducing means to reproduce video or audio data from a recording/reproducing position stored with reference to a corresponding area selected by the area selects means.

{C} Replace abstract with newly written abstract provided by the examiner below.

Art Unit: 2616

Abstract

A recording and reproducing device having a detector, which detects the beginning of inputting a string of characters associated with a user input while recording or reproducing video and/or audio data, storing marking position data with reference to the beginning of the inputting characters of the character string, at the point in time detected by the detector. Wherein a reproducing operation of the recorded data, can be done at a starting point specified pointing to character strings. This allows the user to select character strings generated in a character display area, whereby the recorded video data can be reproduced from the positions stored with reference to user selected character strings.

Claims 1-6 are allowed.

2. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the prior art of record discloses user defined (Bookmark button/key), as well as automatic (based on various detected attributes, such as data rate, scene change, time period periodic), also providing text or character titles with respect to the bookmarks, even user defined titles/text/characters, set by the user or even user initiated with there-after automatic default titles numbered by the system, or text identifications by the system, wherein the user can even change the text of the various bookmarks already made in the teachings disclosed of the prior art of record.

Claim 1 in view of the prior art teachings fails to teach, disclose or fairly suggest the combination associated with a recording and reproducing device comprising:

- an input area specifying means for specifying an area for inputting characters;
- a character inputting means for or {CIM}, a user to input characters in the area specified by the input area specifying means;

Art Unit: 2616

- a displaying *means for* displaying characters input;
- a character input start detection means (CISDM) for detecting the beginning of inputting characters by the user, while recording or reproducing;
- a recording/reproducing position storing means for relationally storing:
 - information indicating a position of data at a time point of detection of the character inputting start by the CISDM;
- a string of characters inputted by the CIM at that time point; and
- information indicating an area wherein the characters have been inputted,
- wherein the information indicating the position, the string of characters and the information indicating the area are related to each other.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
